**Nature's Produce Not Associated with Below Voluntary recall**  
11/10/20

To Whom It May Concern:

Please be advised that Nature's Produce is NOT associated with the below recall.

Due to concerns regarding a recent food borne illness outbreak linked to fresh produce, Nature's Produce has not sourced or distributed any product associated with the recall below.

**Tanimura & Antle Voluntary Recalls Packaged Single Head Romaine Lettuce Due to Potential E. Coli 0157:H7 Contamination**

SOURCE: FDA WEBSITE  
Company Announcement

Out of an abundance of caution, Tanimura & Antle Inc. is voluntarily recalling its packaged single head romaine lettuce under the Tanimura & Antle brand, labeled with a packed on date of 10/15/2020 or 10/16/2020, due to possible contamination with E. Coli 0157:H7. Packages contain a single head of romaine lettuce with the UPC number 0-27918-20314-9. No other products or pack dates are being recalled. There have been no reported illnesses associated with the recalled product.

The recall is being conducted in consultation with FDA, and is based on the test result of a random sample collected and analyzed by the Michigan Department of Agriculture and Rural Development as part of their routine sampling program. A total of 3,396 cartons of potentially affected product were distributed in the United States to the following states: AK, OR, CA, TX, AR, OK, IN, NE, MO, TN, WI, NM, SC, WA, NC, OH, VA, MA, PR, and IL. The potentially affected product was shipped in cases packed in either 12, 15, 18 or 24 heads per case. Retailers and distributors can identify the potentially affected products through the Produce Traceability Initiative (PTI) sticker attached to exterior of the case. The PTI codes are 571280289SRS1 and 571280290SRS1.

E. coli O157:H7 causes a diarrheal illness often with bloody stools. Although most healthy adults can recover completely within a week, some people can develop a form of kidney failure called Hemolytic Uremic Syndrome (HUS). HUS is most likely to occur in young children and the elderly. The condition can lead to serious kidney damage and even death. If consumers are experiencing any of the above symptoms, please contact your physician.

At Tanimura & Antle, food safety is a number one priority and the company prides itself on its preventative measures. It is unlikely that this product remains at retail establishments due to the shelf life of lettuce and the number of days that have passed. We are asking that if any of the packaged single head romaine described above is in the possession of consumers, retailers or distributors, the product be disposed of and not consumed.

Consumers with questions or concerns may call the Tanimura & Antle Consumer Hotline at 877-827-7388 Monday – Friday, 8:00 AM – 5:00 PM.

Please rest assured that Nature's Produce has stringent safety and protocol procedures/policies regarding recalls under our HACCP safety guidelines. If any product is in question, we will always immediately notify you so any issue may be handled in the safest manner to avoid any possible food borne illness. Please feel free to contact us should you have any further concerns.
